April 4, 1996

Dear StorageWorks HS*x*-Series Array Controller Customer,

Thank you for your StorageWorks products order.

Because of the unprecedented popularity of the HS*x*-Series of Array Controllers, it may be necessary for Digital to substitute the controller you ordered with our latest revision controller module(s) as follows:

Order Placed For:	Substitution Controller	Required HSOF Revision
HSJ40–A*x*	HSJ40–C*x*	V2.7
HSJ30–A*x*	HSJ30–C*x*	V2.7
HSD30–A*x*	HSD30–C*x*	V2.7
HSZ40–B*x*	HSZ40–C*x*	V2.7

The HS*xxx*–C variant controller modules are fully supported and equivalent controllers to the HS*xxx* A and B variants you ordered. The HS*xxx*–C variant is shipped only with HSOF V2.7 software and it is NOT downward compatible with previous versions of HSOF software.

The HS*xxx*–C variants can be used with HS*xxx*–A or B variants in dual redundant pairs. However, when using an HS*xxxx*–C variant in a dual redundant pair, all controllers MUST use HSOF Version 2.7 software.

If you have any questions please contact your Digital Sales Representative, Authorized Reseller or our Customer Satisfaction Representative, Bill Plante, at (719) 548-3050.

Once again, thank you for choosing StorageWorks products.

Sincerely,

Storage Business Unit
