Software Product Description

PRODUCT NAME: Remote Office™ Client for Digital NetRider V2.2 for MS–DOS® and Windows™
SPD 63.94.01

DESCRIPTION

The Remote Office Client for Digital NetRider V2.2 for MS–DOS and Windows is an integrated set of software products that provides remote access capabilities for TCP/IP and Novell NetWare® environments. The software kit consists of three software programs: Remote Office Client software, Remote Office Remote Control Master (RCViewer) software, and Remote Office Remote Control Host (RCHost) software.

The Remote Office Client software loads on a PC and allows remote or mobile PC users to establish IP and IPX connections with hosts on their corporate network. The Digital NetRider Remote Office Client uses industry-standard Point-to-Point Protocol (PPP) to make the connection from the remote system to the corporate network. Using a modem and standard telephone lines, remote users can dial into one of Digital's remote access servers that support PPP and simultaneously access all available IP and IPX network resources.

The RCViewer software and the RCHost software together provide industry-leading client/server remote control capabilities for IP/IPX-based networks. RCViewer is a windows-based application that runs on top of a remote node session. RCViewer lets the user take complete control over other PCs on the network from Windows. Users can access their desktop PC from any remote PC, run non-client-server applications, and monitor unattended PCs, such as job servers or data collecting workstations.

RCHost is a memory-resident program (TSR) that is loaded on each PC that the user wants to control.

When a user wants to connect to a PC, RCViewer polls the network to locate all the workstations that have the RCHost loaded and are available. The user simply selects the PC he wants to control from a list of workstation names and RCViewer displays.

FEATURES

The Digital NetRider Remote Office Client includes the following features:

- Provides simultaneous high-speed remote access to TCP/IP and IPX networks over a single asynchronous link.

- Provides remote node connectivity which allows the user to become a full peer on the network. This allows services to be accessed remotely in the same fashion as they are accessed via a local connection.

- Includes a redirector feature which allows the user to map remote LAN services such as disks and printers to the local PC. These services can then be treated as if they were locally attached to the remote PC, allowing "drag and drop" operations. Both LAN Manager and NetWare file and print services can be mapped and coexist transparently to the user.

- Serves remote or mobile users via dial-up telephone lines.

- Provides multi-tiered security, including CHAP and PAP authentication with PPP.

- Fully supports the PPP standard as defined by RFCs 1331, 1332, 1333, and 1378.

- Provides an intuitive user interface. Allows editing of modem scripts and provides a window that allows users to enter login and security information. Connections can be started and stopped at any time using a mouse.

- Includes "answer file" utility which allows network administrators to pre-configure any or all of the values for the client install program.

- Supports dynamic addressing, allowing the server to assign remote TCP/IP addresses.

- Includes all software components needed for the remote PC, including PC and IPX stack components.

APPLICATIONS

Installing the Digital NetRider Remote Office Client installs the following applications in the Windows Program Manager.

- Remote Office Client—Provides remote-node network connections at the click of a button. Includes access to phonebook records, port status, modem status, and access to remote control and network applications.

- Online Help—Explains how to use all of the Remote Office applications.

- Ping—Tests the availability of network hosts and network gateways or traces the path that a message takes from one host to another.

- FTP—Provides an alternate method to transfer files between remote hosts and your PC, or to transfer files between two remote hosts.

- INET—Displays information about the network configuration for your PC.

- Telnet VT —Connects your PC to a remote UNIX host or other system using DEC VT terminal emulation.

Not Supported

- DHCP is not supported in this release of Remote Office Client for Digital NetRider.

- NetBIOS is not supported in this release of Remote Office for Digital NetRider.

- Substitution of other IP stacks or redirectors, except as specifically identified.

HARDWARE REQUIREMENTS

Modems

The Digital NetRider Remote Office Client operates with a high-speed, Hayes-compatible modem running at 9600 baud or higher.

Disk Space Requirements

To install and operate the Digital NetRider Remote Office Client software, you need a minimum of 5 MB of disk space on the system disk. This is an approximate number; actual disk space size may vary depending on the user's system environment, configuration, and software options.

SOFTWARE REQUIREMENTS

- DOS 5.0 minimum

- Windows 3.1 or Windows for Workgroups 3.11 for Windows operation

OPERATION WITH WINDOWS FOR WORKGROUPS

Remote Office provides dial-up connectivity in a Windows for Workgroups environment. The following are required for correct operation:

- Use the Remote Office client software.

- Select the NetRider Redirector as the LAN OS.

- Use the OnNet PC/TCP applications provided with the NetRider product when the Remote Office client software is running.

GROWTH CONSIDERATIONS

The minimum hardware and software requirements for any future version of this product may differ from the requirements of the current version.

DISTRIBUTION MEDIA

RX23 high density floppy disks.

RELATED SOFTWARE PRODUCT DESCRIPTIONS

- DECserver Network Access Software, Version 1.5 (46.13.00)

- Digital NetRider Client for Macintosh®, Version 1.1 (54.76.01)

ORDERING INFORMATION

The Remote Office Client for Digital NetRider can be purchased as follows:

- As a complete hardware/software solution packaged with a DECserver Remote Access Server, DECserver Network Access Software, and additional client software.

Option Number	Description
DSRVH-J*/ND	Digital NetRider Remote Access solution–includes DECserver modem cables, DECserver Network Access software, NetRider Client for Macintosh software, Remote Office Client for NetRider software, and Netscape browser software.

Option Number	Description
DSRVY-JA	Digital NetRider Remote Access solution–includes DECserver 900GM modem cables, DECserver Network Access software, NetRider Client for Macintosh software, Remote Office Client for NetRider software, and Netscape browser software.

* Denotes variant fields. For additional information on available licenses, services, and media, refer to the appropriate price book.

- As bundled "software only" upgrade packages including all NetRider software components; (DECserver Network Access software, NetRider Client for Macintosh software, Remote Office Client for NetRider software, and Netscape browser software. Kits include license, media, and documentation.

Option Number	Description
QB-3RTAA-AA lic/RX23	NetRider Remote Access Multipack Pkg. for 8-port servers
QB-3RTAA-AB lic/RX23	NetRider Remote Access Multipack Pkg. for 16-port servers
QB-3RTAA-AC lic/RX23	NetRider Remote Access Multipack Pkg. for 32-port servers

- As individual software kits:

Option Number	Description
QB-3R4AA-SA	Remote Office Client for NetRider Vx.x for MS–DOS and Windows 8-port license/RX23 media kit
QB-3R4AA-SB	Remote Office Client for NetRider Vx.x for MS–DOS and Windows 16-port license/RX23 media kit
QB-3R4AA-SC	Remote Office Client for NetRider vx.x for MS–DOS and Windows 32-port license/RX23 media kit
QM-3R4AA-AA	Remote Office Client for NetRider Vx.x for MS–DOS and Windows 8-port license-only kit
QM-3R4AA-AB	Remote Office Client for NetRider Vx.x for MS–DOS and Windows 8-port license-only kit
QM-3R4AA-AC	Remote Office Client for NetRider Vx.x for MS–DOS and Windows 8-port license-only kit

DIGITAL LICENSE AGREEMENTS FOR DIGITAL NETRIDER REMOTE OFFICE CLIENT

STOP

IMPORTANT: CAREFULLY READ THE DIGITAL LICENSE AGREEMENT BEFORE PROCEEDING. IF YOU DO NOT AGREE TO ITS TERMS, PLEASE RETURN THE LICENSE AGREEMENT AND ALL THE ACCOMPANYING MATERIALS WITHOUT FURTHER OPENING OR USING THEM. RETURN THEM TO THE SUPPLIER FROM WHICH YOU OBTAINED THEM FOR A FULL REFUND. FURTHER OPENING OR USE OF THE MATERIALS INDICATES YOUR ACCEPTANCE OF THE TERMS OF THE LICENSE AGREEMENT.

LICENSE TERMS

License: Remote Office Client for NetRider Vx.x for MS–DOS and Windows

When you purchase any product that includes the above license, you may use the following program ("Software") under the terms listed below, plus all the terms provided in Additional Terms below.

1. GRANT

The software specified above includes three (3) software programs: Remote Office Client software, Remote office Remote Control Master (RCViewer) software, and Remote Office Remote Control Host (RCHost) software. Digital Equipment Corporation ("DIGITAL") grants you the right to use Remote Office Client software and RCViewer software, plus any prior versions, on an unlimited number of computers. You may install RCHost software on one computer for each eight ports on the licensed NetRider server. These rights are granted, provided that the software will only be used to communicate via properly licensed NetRider server(s). A NetRider server is a DECserver that is licensed for Remote Office Client for NetRider Vx.x for MS–DOS and Windows on every port, where "every port" is defined as the maximum number of concurrent user connections supported by the DECserver.

You may copy the software into the local memory or storage device of the specified number of computers. You may copy the software onto a network server for the sole purpose of distributing the software to the specified quantity of computers. You may make archival or backup copies of the software.

You may permanently transfer your rights to use the software, the software itself, including any updates to the specified version of the software, and the accompanying documentation, including this License Agreement, provided you retain no copies of the software, updates, documentation, License Agreement, and the recipient agrees to the terms of this License Agreement.

Additional Terms

2. COPYRIGHT

The software is owned by Digital and its suppliers, and is protected by U.S. copyright laws and international treaties. Your use of the software is subject to the applicable copyright laws and the express rights and restrictions of this license agreement.

3. RESTRICTIONS

You may not rent, lease, or otherwise transfer the software except as expressly authorized in this License Agreement. You may not remove any copyright, trademark, or other proprietary notices from the software of the media. You may not reverse engineer, decompile, or disassemble the software. However, in some jurisdictions, the law permits reverse engineering for interoperability under certain conditions.

U.S. GOVERNMENT RESTRICTED RIGHTS

The software and documentation are provided with "RESTRICTED RIGHTS." Use, duplication, or disclosure the U.S. Government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of DFARS 252.227.-7013, or FAR 52.227-14 Alt. III, as applicable. Contractor/manufacturer is Digital Equipment Corporation.

GENERAL

You are responsible for compliance with all applicable export or re-export control laws and regulations if you export the software.

This agreement is governed by and is to be construed under the laws of the Commonwealth of Massachusetts.

If you have questions concerning this agreement, please contact your local Digital sales office, or write to Digital Equipment Corporation, 111 Powdermill Road, Maynard, MA 01754-1418.

SOFTWARE WARRANTY

Digital products are warranted against defects in workmanship and materials for the period specified below, commencing on the date of delivery. Additional warranties may apply as provided in documentation accompanying Digital products. Digital does not warranty that the operation or execution of any product will be uninterrupted or error-free.

Exclusive remedies: Digital will repair or replace any defective Digital product reported to Digital during the warranty period. Repair or replacement will be done on-site, or at a Digital facility, depending on the country and the product. At its option, Digital may refund the purchase price in lieu of providing a repaired or replacement product.

Warranty Limitations: Digital's warranty does not apply to conditions resulting from improper use, external causes, or modifications to the Digital product.

Third-Party Products Warranty: Digital does not warrant third-party products, which Digital ships "as is." Third-party products may be warranted by the manufacturer as expressly provided in the third-party documentation accompanying the product. Purchaser's remedy under any third-party warranty is provided in third-party documentation accompanying the product.

EXCEPT AS EXPRESSLY SET FORTH IN THIS WARRANTY, NO OTHER WARRANTIES OR CONDITION, EXPRESSED OR IMPLIED, APPLY. DIGITAL EXPRESSLY EXCLUDES THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, AND THOSE ARISING BY STATURE OR OTHERWISE IN LAW OR FROM A COURSE OF DEALING OR USAGE OF TRADE. DIGITAL'S LIABILITY TO YOU FOR ANY CLAIM OR DAMAGES RELATING TO ANY DEFECTIVE PRODUCT OR FOR ANY OTHER CLAIM ARISING OUT OF THE PURCHASE OR USE OF THIS PRODUCT WILL BE LIMITED TO ITS ACTUAL PURCHASE PRICE PAID TO DIGITAL OR TO ITS AUTHORIZED RESELLER. DIGITAL'S ENTIRE LIABILITY IS LIMITED TO DIRECT DAMAGES ONLY. IN NO EVENT SHALL DIGITAL BE LIABLE FOR ANY INCIDENTAL, CONSEQUENTIAL, SPECIAL, OR INDIRECT DAMAGES FOR ANY LOSS OF DATA OR PROGRAMS, LOSS OF USE, LOST PROFITS, OR ANY ECONOMIC LOSS, REGARDLESS OF THE FORM OR ACTION (WHETHER CONTRACT, TORT, INCLUDING NEGLIGENCE, OR STATUTORY).

Some jurisdictions do not allow limitations on how long an implied warranty lasts or the exclusion of limitations of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives

you specific legal rights, and you may also have other legal rights which depend on local law.

Table 1

Network Products Limited Warranty

Product	Coverage[2]	Service Upgrades[1]
Network hardware	1 year RTD	See 2.
Application software	90 day conformance to SPD	Software upgrade service is available. See 1.
Media diskettes	90 days return to Digital	Media and documentation services are available on a selected basis. See 1.

[1]On-site warranty is available for purchase in most locations. Please contact your salesperson for details.

[2]RTD = Purchaser returns a product to Digital's return center for repair or replacement.
