Microsoft BackOffice Small Business Server 4.5 Installation Instructions for Compaq Prosignia and ProLiant Servers

Abstract: This document provides instructions for installing the Microsoft BackOffice Small Business Server (SBS) 4.5 software on specified Compaq Prosignia and ProLiant servers.

The Microsoft BackOffice SBS 4.5 software does not supply the necessary drivers for the following Compaq servers: Compaq Prosignia Server 720, Prosignia Server 740, Compaq ProLiant 400, ProLiant 800, ProLiant 1600, and ProLiant 1850R. This document provides step-by-step instructions to identify and to install the necessary drivers, allowing successful completion of the Microsoft BackOffice SBS software installation.

Note: This document describes the installation instructions for Microsoft BackOffice SBS 4.5 only. For Microsoft BackOffice SBS 4.0/4.0(a) installation instructions, search the Compaq website (www.compaq.com) for additional white papers.

Microsoft BackOffice Small Business Server 4.5 Installation Instructions for Compaq Prosignia and ProLiant Servers

White Paper prepared by Small and Medium Business Segment

First Edition (July 1999)

Document Number 0347-0799-A

Introduction

This document provides instructions for installing the Microsoft BackOffice SBS 4.5 on the following Compaq servers:

- Prosignia Server 720
- Prosignia Server 740
- ProLiant 400
- ProLiant 800
- ProLiant 1600
- ProLiant 1850R

These instructions do not apply to other Compaq server models.

Note: This document describes the installation instructions for Microsoft BackOffice SBS 4.5 **only**. It supersedes previously published white papers on this topic. For Microsoft BackOffice SBS 4.0/4.0(a) installation instructions, search the Compaq website (www.compaq.com) for additional white papers.

Requirements

IMPORTANT: For Year 2000 (Y2K) compliance, this software requires an additional Microsoft Service Pack. You can download the latest Service Pack from the Microsoft website (www.microsoft.com). You may also want to check this website for additional upgrades to the individual BackOffice components.

Minimum Requirements

Table 1 and Table 2 list the minimum hardware and software requirements.

Table 1. Hardware Requirements

√ Hardware	
<input type="checkbox"/>	Compaq Prosignia Server 720, Prosignia Server 740, ProLiant 400, ProLiant 800, ProLiant 1600, ProLiant 1850R
<input type="checkbox"/>	64-MB RAM minimum (more RAM recommended)
<input type="checkbox"/>	Computer monitor, keyboard, and mouse
<input type="checkbox"/>	1 network interface adapter or card (NIC)
<input type="checkbox"/>	Hard drive with at least 3 GB free space
<input type="checkbox"/>	1.44-MB diskette (floppy) drive
<input type="checkbox"/>	At least 5 blank diskettes
<input type="checkbox"/>	CD-ROM drive

Table 2. Software Requirements

√ Software	
<input type="checkbox"/>	Microsoft BackOffice Small Business Server 4.5 <ul style="list-style-type: none"> • Outlook 2000 version <ul style="list-style-type: none"> <input type="checkbox"/> 3 operating system CDs <input type="checkbox"/> 1 Outlook 2000 CD <input type="checkbox"/> 3 boot diskettes • Office 2000 Professional version <ul style="list-style-type: none"> <input type="checkbox"/> 3 operating system CDs <input type="checkbox"/> 2 Office 2000 Professional CDs <input type="checkbox"/> 3 boot diskettes
<input type="checkbox"/>	Compaq SmartStart and Support Software (supplied with the Compaq server)
<input type="checkbox"/>	For Prosignia Server 720 or ProLiant 400 only: Must use 11 May 1999 ROM or later for SmartStart 4.23 support. This ROM image can be downloaded from the Compaq Support Software website (www.compaq.com/support).

Required Information

Table 3 lists additional information you need to know for the installation.

Table 3. Information Required for Installation

√ Information	
<input type="checkbox"/>	Name of licensee for the Microsoft BackOffice Small Business Server 4.5 software
<input type="checkbox"/>	Name of your organization
<input type="checkbox"/>	Name of server
<input type="checkbox"/>	Name of domain
<input type="checkbox"/>	Product ID for the Microsoft BackOffice SBS (see software packaging)

Additional Information

This section contains additional information about the installation.

Install With or Without a Modem

You can follow one of two modem paths during the installation:

- Install with a modem
- Install without a modem

Review Table 4 for additional minimum requirements if you plan to install the Microsoft BackOffice SBS 4.5 software on a Compaq Prosignia and ProLiant server with a modem. Refer to the Microsoft BackOffice SBS 4.5 documentation for the services that are available for various modem types.

Table 4. Additional Requirements If You Have a Modem

√ Additional Minimum Requirements	
<input type="checkbox"/>	Driver for modem (supplied by the modem manufacturer)
<input type="checkbox"/>	Area code and phone number for telephone line(s) connected to modem(s)

Display Windows

When installing Microsoft BackOffice SBS 4.5 on a Prosignia Server 720 or ProLiant 400, the following Display windows may appear several times:

- Invalid Display Settings window
- Display Properties window

During the installation:

- Click **OK** when the Invalid Display Settings window appears.
- Click **Cancel** when the Display Properties window appears.

These windows will no longer appear after the system drivers are updated (see “Task 8: Updating the system drivers” in Table 8).

Creating Compaq Server Support for Microsoft Windows NT 4.0

Compaq Server Support for Microsoft Windows NT 4.0, also referred to as the Support Software Diskettes (SSD) for Windows NT, are required for the Microsoft BackOffice SBS 4.5 software installation. **This section provides two sets of instructions.** Identify the SmartStart and Support software version you are using; then follow the instructions in the appropriate section.

These instructions assume you are performing the installation for the first time.

Using SmartStart 4.23 or Later

Table 5. Creating SSD for Windows NT Using SmartStart 4.23 or Later

√	Procedures	Steps
□	Booting the SmartStart and Support Software CD	<ol style="list-style-type: none"> 1. Insert the SmartStart and Support Software CD into the CD-ROM drive. 2. When the first interactive window appears, select your language preference. The Regional Settings window appears. 3. Click Next. The System Settings Summary window appears. 4. Click Continue. The License Agreement window appears. 5. Click I Agree. Then, click OK. 6. Under Installation Path, select Manual Configuration. Then, click Begin. 7. Expand the Microsoft tree on the Operating System Selection page. 8. Highlight Microsoft BackOffice Small Business Server 4.5. Then, click Next. 9. When the Operating System Selection Summary window appears, click Continue. The system restarts. After the system restarts, the System Partition Installation Utility automatically runs. The system then displays: <i>Formatting Temporary Swap Partition</i> After this process completes, the SmartStart and Support Software CD restarts at the Diskette Builder window.

continued

Table 5. Creating SSD for Windows NT Using SmartStart 4.23 or Later (continued)

√	Procedures	Steps
<input type="checkbox"/>	Creating support software diskettes	<ol style="list-style-type: none"> 1. From the Diskette Builder window, click Create Support Software. 2. From the Integration Server Selection window, select Create software diskettes from CD only. Then, click Next. 3. Expand the Compaq tree. 4. Make sure Compaq Server Support for Microsoft Windows NT 4.0 is selected. Look under Description to see how many diskettes you need to create the support software. Make sure you have the required number. 5. Click Next to launch the Diskette Builder Utility. The system prompts you to insert diskette #1. 6. Insert the first diskette. Then click Next. Note: If the diskette contains information (that is, the diskette is not blank), the system prompts you to verify the deletion of this data. Click Yes to overwrite any information already on the diskette. The system continues to prompt you to remove the diskette and to insert another diskette until all of the required diskettes are created. 7. Click Finish to exit the Diskette Builder Utility. 8. Click Next to continue the SmartStart process. 9. On the Manual Path window, click Continue. 10. Remove the SmartStart and Support Software CD and the diskette when prompted. 11. Insert SBS boot diskette #1 (of 3). 12. Click Continue on the Manual Path window. The system restarts. 13. Follow the steps in the next procedure, "Displaying the contents of the <i>Ntreadme.hlp</i> file," and then start the installation of Microsoft BackOffice SBS 4.5 by following the steps listed in the "Installation Instructions" section of this white paper.
<input type="checkbox"/>	Displaying the contents of the <i>Ntreadme.hlp</i> file	<p>You must perform this procedure on a separate system (one that has a Windows 95 or Windows NT operating system installed).</p> <p>You will need to know the location of certain files on the SSD for Windows NT. This information is found in the <i>Ntreadme.hlp</i> file. To display the contents of the <i>Ntreadme.hlp</i> file:</p> <ol style="list-style-type: none"> 1. Insert SSD for Windows NT diskette #1 into the diskette drive. 2. Right-click Start, then Explore, then 3 ½ Floppy (A:). 3. Double-click the <i>Ntreadme.hlp</i> file. The Help Topics window appears. 4. Double-click Compaq Server Support for Microsoft Windows NT. 5. Double-click Compaq SSD for Windows NT. <p>A list of the contents of each SSD for Windows NT diskette appears. Print this screen for future reference.</p>

Using SmartStart Version 4.22 or Earlier

Note: Use the following procedures for Prosignia Server 720 and ProLiant 400 **only**.

Table 6. Creating SSD for Windows NT Using SmartStart 4.22 or Earlier

√	Procedures	Steps
<input type="checkbox"/>	Booting the SmartStart and Support Software CD	<ol style="list-style-type: none"> 1. Insert the SmartStart and Support Software CD into the CD-ROM drive. 2. When the first interactive window appears, select your language preference. The Regional Settings window appears. 3. Click Next. The System Settings Summary window appears. 4. Click Continue. The License Agreement window appears. 5. Click I Agree. Then, click OK. The system prompts you to insert the SmartStart Server Profile diskette. 6. Insert the SmartStart Server Profile diskette. 7. Click OK. The System Utilities window appears.
<input type="checkbox"/>	Creating support software diskettes	<ol style="list-style-type: none"> 1. From the System Utilities window, double-click Create Support Software. 2. Click OK to launch the Diskette Builder Utility. 3. Expand the Compaq tree. 4. Select Compaq Support Software for Microsoft Windows NT 4.0. Look under Description to see how many diskettes you need to create the support software. Make sure you have the required. 5. Click Next to launch the Diskette Builder Utility. 6. After the system prompts you to insert diskette #1, insert the first diskette. Then, click OK. Note: If the diskette contains information (that is, the diskette is not blank), the system prompts you to verify the deletion of this data. Click Yes to overwrite any information already on the diskette. The system continues to prompt you to remove the diskette and to insert another diskette until all of the required diskettes are created.

Installation Instructions

Part 1: Starting the Microsoft BackOffice SBS Installation

This section provides the steps you must perform to begin the Microsoft BackOffice SBS 4.5 installation.

You can follow one of two modem paths during the installation:

- Install with a modem
- Install without a modem

The following procedures include the necessary steps for installing with or without a modem.

Note: The following steps assume that you have already created the Support Software Diskettes (SSD) for Windows NT. If you have not created these diskettes, see the previous section, “Creating Compaq Server Support for Microsoft Windows NT 4.0.”

Table 7. Initial Microsoft BackOffice SBS Installation Procedures

√	Procedures	Steps
□	Task 1: Starting the installation	<p>At the Compaq server on which you want to install Microsoft BackOffice SBS 4.5:</p> <ol style="list-style-type: none"> 1. Start the installation by using diskette #1 (of 3 boot diskettes) supplied with Microsoft BackOffice SBS 4.5. 2. When prompted, remove boot diskette #1 and insert boot diskette #2. 3. At the end of the copy process (of boot diskette #2), press Enter to continue. This causes the setup process to detect the system hardware. 4. When prompted, remove boot diskette #2 and insert boot diskette #3. After boot diskette #3 is read, the system prompts you to specify additional devices. 5. Do one of the following: <ul style="list-style-type: none"> • For Prosignia Server 720 or ProLiant 400, press the S key (to specify additional devices). Then, go to Step 6. • For Prosignia Server 740, ProLiant 800, ProLiant 1600, ProLiant 1850R, go to Step 12. <p>Note: If a Compaq array controller is added as the primary boot controller on any of the servers listed above, go to Step 6.</p> 6. Remove boot diskette #3.

continued

Table 7. Initial Microsoft BackOffice SBS Installation Procedures *(continued)*

√	Procedures	Steps
□	<p>Task 1: Starting the installation <i>(continued)</i></p>	<p>7. Insert the appropriate SSD for Windows NT diskette.</p> <p>Note: To help you determine which diskette to use, locate the appropriate SCSI driver on the SSD for Windows NT list of contents that you obtained from the <i>Ntreadme.hlp</i>.</p> <p>8. Press Enter.</p> <p>Compaq SCSI Controllers for Windows NT 4.0 and Compaq Array Controllers for Windows NT 4.0 appear on the screen.</p> <p>9. Highlight the controller that is your primary boot controller, then press Enter.</p> <p>10. Press Enter to continue. (It is not necessary to install additional devices.)</p> <p>11. Remove the SSD for Windows NT diskette. Then insert the Microsoft BackOffice SBS diskette #3.</p> <p>12. Press Enter to load the Microsoft device drivers.</p> <p>13. Remove the Microsoft BackOffice SBS diskette #3. Then insert the Microsoft BackOffice SBS operating system CD when prompted.</p> <p>14. Press Enter to continue loading the Microsoft device drivers.</p> <p>15. Press Enter to accept the default hardware and software components when the Windows NT Server Setup window appears.</p>
□	<p>Task 2: Choosing disk carving options</p>	<p>IMPORTANT:</p> <ul style="list-style-type: none"> • If there is a Compaq system partition (EISA Utilities), remove it <i>before</i> installing the Microsoft BackOffice SBS 4.5 software. (See Steps 1 through 3 below.) Failure to delete this partition will result in the failure of the installation process. • If there is no EISA Utilities partition, skip to Step 4. <p>1. When the partition screen appears, highlight the EISA Utilities partition. Then, press the D key to delete the partition.</p> <p>A dialog box appears indicating that you are about to delete a system partition.</p> <p>2. Press Enter to continue.</p> <p>A dialog box appears indicating the EISA partition is about to be deleted.</p> <p>3. Press the L key to delete.</p> <p>At this point, there should be one unpartitioned space on the hard drive.</p> <p>Note: If this space is over 8000 MB, the hard drive can be divided into two (or more) partitions. It is recommended that a partition be at least 3000 MB (3 GB). You can specify a larger partition if you desire.</p>

continued

Table 7. Initial Microsoft BackOffice SBS Installation Procedures *(continued)*

√	Procedures	Steps
<input type="checkbox"/>	<p>Task 2: Choosing disk carving options <i>(continued)</i></p>	<p>4. Do one of the following:</p> <ul style="list-style-type: none"> • Press Enter to install Microsoft BackOffice SBS 4.5. Then, <ul style="list-style-type: none"> <input type="checkbox"/> Select Format the partition using NTFS file system. <input type="checkbox"/> Press Enter to continue. <p>The setup process formats the partition.</p> • Press the C key to create a partition. Then, <ul style="list-style-type: none"> <input type="checkbox"/> Use the backspace key to delete the currently displayed number. Then, type 3000 (or greater). <input type="checkbox"/> Press Enter to create the partition. <input type="checkbox"/> Press Enter to install Microsoft BackOffice SBS 4.5 (on drive C:). <input type="checkbox"/> Select Format the partition using NTFS file system. <input type="checkbox"/> Press Enter to continue. <p>The setup process formats the partition.</p> <p>5. If prompted for an SSD for Windows NT diskette, press Enter.</p> <p>Note: Use the same SSD for Windows NT diskette as you did in Step 4 of "Task 1: Starting the installation." After the files have been copied from the diskette, remove the diskette before the system restarts.</p> <p>The setup program copies files to the hard drive. When the copying is complete, the system restarts. This process requires no user intervention.</p>
<input type="checkbox"/>	<p>Task 3: Installing the operating system</p>	<p>After the system restarts, the Microsoft BackOffice Small Business Server 4.5 operating system installation automatically starts.</p> <ol style="list-style-type: none"> 1. Supply licensee name and organization when prompted. <p>Note: At this point, you can change the default server name and the default domain.</p> 2. Press Next. <p>The Windows NT Server Setup screen appears.</p> 3. When installing on a Prosignia Server 720 or ProLiant 400: <ul style="list-style-type: none"> • The Microsoft BackOffice SBS 4.5 setup begins searching for network adapters, and a setup parameter warning message similar to the following may appear: <p><i>DetectAdapters value is missing or invalid.</i></p> • Click OK to continue. (The missing or invalid value will be resolved once the correct network drivers are installed later in the installation.) <p>The system sets up network files.</p>

continued

Table 7. Initial Microsoft BackOffice SBS Installation Procedures *(continued)*

√	Procedures	Steps
□	<p>Task 3: Installing the operating system <i>(continued)</i></p>	<p>4. If no modem is installed:</p> <ul style="list-style-type: none"> • You may get a Setup Message window, which displays the following: <i>Remote Access is not configured with any ports. You have an invalid RAS configuration.</i> • Click OK to continue. • This message may be followed by an Error window, which displays the following: <i>The network failed to start.</i> • Click Cancel to continue. <p>5. Set the correct date, time, and time zone when prompted.</p> <p>6. Click Close.</p> <p>The setup program copies files. Then, the system automatically restarts. After the system restarts, the following message may appear: <i>At least one service or driver failed during system setup. Use Event Viewer to examine the Event log for details.</i></p> <p>If this message appears, it is because the system detected and loaded incorrect network drivers.</p> <p>Note: The following messages may also appear:</p> <ul style="list-style-type: none"> • If no modem is installed in the system, the following message may be displayed for several minutes: <i>Please wait while the domain list is created.</i> • This message may be followed by the following Windows message: <i>The full domain list cannot be generated at this time. Some domains may be missing from the list.</i> <p>Then, a Welcome message appears, informing you that the setup program will upgrade your system NT Service Pack 4.</p> <p>7. Click Next to continue.</p> <p>A License Agreement window appears.</p> <p>8. Click I Agree. Then, click Next.</p> <p>9. When prompted for the 10-digit CD key, enter the CD key from the sticker on your CD. Then, press Next. (Later during the installation, you will be prompted for a Microsoft Office 2000 or Microsoft Outlook 2000 CD, enter the CD key from the back of the CD case.)</p> <p>Note: An Installed Modems window may appear displaying an <i>Undetected Modem</i> message (that is, the modem was not detected correctly). If this appears, go to "Task 4: Installing and configuring modem drivers." Otherwise, go to Step 10.</p>

continued

Table 7. Initial Microsoft BackOffice SBS Installation Procedures *(continued)*

√	Procedures	Steps
<input type="checkbox"/>	Task 3: Installing the operating system <i>(continued)</i>	<p>10. If no modem is installed:</p> <ul style="list-style-type: none"> • On the Installed Modems window, which will not display a modem name, click Cancel. • When asked if you want to cancel, click Yes. • When asked if you want the setup program to continue after the next restart, click Yes. • When the Invalid Display Settings window appears, click OK. • When the Display Properties window appears, click Cancel. • If these windows appear again, follow the same procedure. <p>Proceed to the steps outlined in the next section, "Part 2: Completing the Microsoft BackOffice SBS Installation."</p>
<input type="checkbox"/>	Task 4: Installing and configuring modem drivers	<ol style="list-style-type: none"> 1. Highlight Undetected Modem. (You may need to click twice to highlight.) 2. Click Change. A message appears indicating RAS must be reconfigured. 3. Click OK. The Modems Properties window appears. 4. Click Remove to delete the undetected modem. The Modem Setup message box appears, verifying the removal of the modem. 5. Click Yes to verify the removal. 6. Click Add to add a modem. The Install New Modem window appears. 7. Select the Don't detect my modem; I will select it from a list box. Then, click Next. 8. Click Have Disk. 9. Insert the manufacturer's modem driver installation diskette. Then, click OK. The Install New Modem window appears. It should indicate the modem that was found. 10. On the next Install New Modem window, select on which port the modem should be installed. (The port is usually COM2 or COM3, depending on your server configuration.) Then, click Next.

continued

Table 7. Initial Microsoft BackOffice SBS Installation Procedures (continued)

√	Procedures	Steps
□	Task 4: Installing and configuring modem drivers (continued)	<ol style="list-style-type: none"> 11. When the Modem Setup window appears, indicating the system must be restarted before using the modem, click OK. The Location Information window appears. 12. Supply the appropriate information in the Location Information window. Then, press Next. A confirmation message appears, indicating the modem was set up correctly. 13. Remove the modem driver installation diskette. 14. Click Finish to continue. The Modems Properties window appears, displaying the correct information about your modem. 15. Click Close. A Modem Setup window appears, indicating that dial-up networking needs to be configured. 16. Click Yes. The Remote Access Setup window may appear, displaying: <i>Undetected Modem</i> 17. Click Remove to continue. 18. Click Yes to confirm the removal of the port. 19. Click Add to add a RAS device. The Add RAS Device window appears. 20. Click OK when your modem appears in the RAS Capable Devices box. 21. Click Continue to proceed. The system makes internal updates, then the Network Settings Change window appears. The background window continues to display an <i>Undetected Modem</i> message. This will be resolved after the system restarts later during the installation. The system prompts you to restart the server. IMPORTANT: Do not restart the server at this time! 22. Click No when prompted to restart the server. Then, go to "Task 5: Completing the initial process."

continued

Table 7. Initial Microsoft BackOffice SBS Installation Procedures *(continued)*

√	Procedures	Steps
<input type="checkbox"/>	Task 5: Completing the initial process	<ol style="list-style-type: none"> 1. If the Installed Modems window appears, click Cancel. 2. Click Yes to confirm the cancel. 3. When prompted to continue the setup program after the next restart, click Yes. <p>Note: The following Display windows may appear:</p> <ul style="list-style-type: none"> • Click OK to close the Invalid Display Settings window. • Click Cancel to close the Display Properties window. <p>Proceed to the steps outlined in the next section, "Part 2: Completing the Microsoft BackOffice SBS Installation."</p>

This completes Part 1 of the installation process. Proceed to Part 2.

Part 2: Completing the Microsoft BackOffice SBS Installation

The Microsoft BackOffice SBS 4.5 software may incorrectly identify your onboard network interface card (NIC). Before you can continue with the Microsoft BackOffice SBS 4.5 installation, perform the steps in Task 6 in Table 8 to select the correct Compaq network adapter. The remainder of the table lists the steps you need to perform to complete the installation and to update system drivers.

Table 8. Final Microsoft BackOffice SBS Installation Procedures

√	Procedures	Steps
□	<p>Task 6: Selecting the correct network interface adapter or card (NIC)</p>	<ol style="list-style-type: none"> 1. Select Start, then Settings, then Control Panel. 2. Double-click the Network icon. The Network window appears. 3. Select the Adapters tab. 4. Remove the entry in the Network Adapters window: <ul style="list-style-type: none"> • Highlight the entry in the Network Adapters window. • Click Remove. A warning box appears. • Click Yes to continue. 5. Add the correct network interface adapter (from the appropriate SSD for Windows NT diskette): <ul style="list-style-type: none"> • Click Add. • Click Have Disk. • Insert the appropriate SSD for Windows NT diskette. Note: To help you determine which diskette to use, locate the appropriate driver on the SSD for Windows NT list of contents that you obtained from the <i>Ntreadme.hlp</i> file. • Do one of the following: <ul style="list-style-type: none"> □ For Prosignia Server 720 and ProLiant 400, type A:\net\intelnic. Click OK. Then, highlight Compaq Ethernet/Fast Ethernet or Gigabit NICs. □ For Prosignia Server 740, ProLiant 800, ProLiant 1600, and ProLiant 1850R, type A:\net\netflx3. Click OK. Then, highlight Compaq NetFlex-3 Controller. • Click OK. The system copies the correct network interface adapter software driver from the diskette to your hard drive. • When the copying is completed (green diskette drive light is off), remove the SSD for Windows NT diskette.

continued

Table 8. Final Microsoft BackOffice SBS Installation Procedures (continued)

√	Procedures	Steps
□	<p>Task 6: Selecting the correct network interface adapter or card (NIC) (continued)</p>	<ol style="list-style-type: none"> 6. Select the Bindings tab to update the system settings. 7. Select the Protocol tab to set the IP address. The system displays the network protocol. 8. Click Properties (once or twice). If there is no information in the IP Address field or the Subnet Mask field, enter this information: <ul style="list-style-type: none"> • In the IP Address field, type 10.0.0.2. (This address is the recommended Microsoft default and should be used unless there are network conflicts. Contact Microsoft Technical Support if conflicts occur.) • In the Subnet Mask field, type 255.255.255.0. 9. Click OK. 10. Close the Control Panel window. 11. Click Close to exit the Network dialog box. If a setup message appears indicating that the Remote Access is not configured, click OK. You must now restart the system for the new settings to take effect. 12. At the Network Settings Change window, click Yes to shut down and restart your computer. The system restarts.
□	<p>Task 7: Completing the Microsoft BackOffice SBS software installation</p>	<p>After the system restarts, the Installed Modems window may appear.</p> <ul style="list-style-type: none"> • If the  symbol appears, setup was unable to verify your modem. • Click Next to continue. (This issue will be resolved later during the installation.) <p>If there was no modem in the server at the time of the installation:</p> <ul style="list-style-type: none"> • Click Next to continue. • If a message indicating that there is no modem installed on this server appears, click Yes to proceed. <p>Then, the Hardware Confirmation window appears listing the hardware found on the system.</p>

Table 8. Final Microsoft BackOffice SBS Installation Procedures *(continued)*

√	Procedures	Steps
□	<p>Task 7: Completing the Microsoft BackOffice SBS software installation <i>(continued)</i></p>	<ol style="list-style-type: none"> 1. Click Next to continue. A message may appear indicating that the video card should display at least 16 colors. 2. Click OK to continue. A message appears indicating that Windows NT Service Pack 4 is about to be installed. The server automatically restarts after the installation is complete. Note: If the following Display windows appear: <ul style="list-style-type: none"> • Click OK to close the Invalid Display Settings window. • Click Cancel to close the Display Properties window. The Small Business Server 4.5 Setup Window Will Now Continue window appears. (Windows NT 4.0, Service Pack 4 has been successfully installed.) 3. Click Next to continue. The Company Information window appears. 4. Type the appropriate company information. Then, click Next to continue. 5. When prompted for an Administrator password, do not enter a password. Simply, press the Enter key. 6. Type the 25-character CD key. Then, click Next. 7. Select Complete Installation. Then, click Next. 8. If you have installed a modem, enter the Business fax number when prompted. Then, click Next. 9. When the SQL Database Configuration appears, click Next. Your Small Business Server Installation window appears. 10. Accept the default values or make other selections. Then, click Next. 11. When the Folders for Small Business Server Data window appears, click Next. The Small Business Component Installation window appears while the system installs the components. Note: The installation may take some time to complete, but it will ensure that all of the necessary components are installed. After the first phase of the component installation, the system automatically restarts and continues with the tasks shown in the Windows Update window. At this point, the system prompts you to insert the Microsoft BackOffice SBS 4.5 operating system CD #2. 12. Insert the Microsoft BackOffice SBS 4.5 operating system CD #2. Then click OK. The installation process continues to copy files from the CD to the hard drive.
