

In a continued effort to support Hewlett-Packard Company and HP customers, TDi is pleased to allow AlphaServer GS80/GS160/GS320 customers with an AlphaServer GS80/GS160/GS320 System Management Console (SMC) to upgrade their SMC ConsoleWorks to the current RETAIL version for FREE. To order your free ConsoleWorks Version 2.0, please call 1.800.695.1258 and ask for the SMC ConsoleWorks Offer or send email to [sales@tditx.com](mailto:sales@tditx.com) and ask for the SMC ConsoleWorks Offer.

This offer will allow SMC customers the ability to run the RETAIL version of ConsoleWorks on Microsoft Windows 2000, OpenVMS, TRU64 Unix, HP-UX, Linux or other operating systems to manage their whole enterprise. (Note – the AlphaServer GS80/GS160/GS320 SMC applications such as the AlphaServer Partition Manager, CAPM, are supported on the existing SMC Windows 2000 platform only). By upgrading to the RETAIL ConsoleWorks through this offer, all ConsoleWorks-imposed restrictions on managing just the AlphaServer GS80/GS160/GS320 from the AlphaServer GS SMC are removed. Customers taking advantage of this offer will be able to manage their whole enterprise with the same solution by simply purchasing maintenance and support as well as additional connections as needed.

For more information on TDi and ConsoleWorks, see <http://www.tditx.com>
