Dear StorageWorks HS*x*50 Array Controller Customer,

This package contains the HS*x*50-series HSOF Version 5.0 Software, License and Documentation. The new HS*x*50 Array Controllers provide significant availability, performance, and functionality enhancements.

The HS*x*50 and HSOF Version 5.0 provides the following features on HS*x*-series controllers:

- I/O throughput and bandwidth performance improvements
- RAID, Write-back Cache and Disk Mirroring as standard features
- Disk Partitioning for improved device management
- Windows NT Operating System support
- Adapter support including CIPCA, KZPSA, KFPSA and KFTIA
- Device support including, SWXD3-series disks, and Tape Libraries
- New features in subsystem management services and local utilities including Configuration Saved on Disk and Auto New Spare features

For more information about the features and performance of HS*x*50 and HSOF Version 5.0 software, refer to the accompanying release notes. For other information on HS*x*50-series controllers, contact your Digital sales representative or Digital distributor. You can request additional information about StorageWorks products by dialing the StorageWorks hotline at (800) StorWor (800–786–7967) in the United States or dial (508) 841–7000.

Sincerely,

Kathy Cara
