

## ***HP TP Web Connector Version 5.1B***

May 2009

Dear Customer,

This letter includes information on *HP TP Web Connector* that you should be aware of before installing the product. The TP Web Connector is licensed with ACMS. A separate license does not have to be purchased.

### ***Features and Enhancements***

TP Web Connector Version 5.1B is supported on OpenVMS Integrity servers Version 8.2-1 or later and OpenVMS Alpha Version 8.2 or later.

#### **TPware Intrusion Records in the NEW Database on Integrity server Systems**

In this release of TPware, on OpenVMS Integrity servers, the TPware intrusion records are written only in the NEW database, thus making them visible cluster-wide. On Alpha systems, the intrusion records are written in the OLD intrusion database and this functionality was also available in the earlier releases.

To enable this feature, the security privilege is made available to the gateway server during the server startup.

### ***Kit Contents***

The following lists the major components of the *HP TP Web Connector* kit. The term TPware refers to a collection of components that comprise the client portion of the HP TP Web Connector product.

- *HP TP Web Connector Version 5.1B*
- *HP TP Web Connector Version 5.1B Software Product Description*
- *HP TP Web Connector Installation Guide, V5.0*
- *HP TP Web Connector Getting Started, V5.0*

### ***Release Notes***

Prior to installing the product, it is recommended that you read the *Release Notes*. The *Release Notes* contain a summary of the known problems, restrictions and installation-related instructions, as well as new features.

The *Release Notes* for the *HP TP Web Connector* product are on the TPware Product Installation Package. The *Release Notes* can be accessed from the following files:

*webcon\_release\_notes.html*  
*webcon\_release\_notes.pdf*

The *Release Notes* applicable to the HP TP Web Connector Gateway for ACMS are on the HP TP Web Connector Gateway Installation Package. The *Release Notes* can be assessed by invoking the appropriate command when running the VMSINSTAL procedure. The file name is: *ACMSDA051B.RELEASE\_NOTES*.

### ***Installation Information***

Read the *Release Notes* and *Installation Guide* for detailed information on how to install the product. These documents also identify any restrictions and how they may apply to your environment.

Refer to the *HP TP Web Connector Version 5.1B Software Product Description* for prerequisite and optional software requirements.

The *setup.exe* program takes you step-by-step through the install procedure.

### ***Web Page Information***

For additional information on the *HP TP Web Connector* and related products, go to the HP web site (<http://h71000.www7.hp.com/commercial/acms/index.html>). The TPware products are accessed by selecting the required link.

### ***Retired Features***

The following features have been retired:

- Support for OpenVMS VAX
- Support for the Compaq Portable TP for Windows NT product and its MTS/DCOM transport

Sincerely,

OpenVMS Product Management
