Errata for SRC Research Report 131a:
The Juno-2 Constraint-Based Drawing Editor

Allan Heydon and Greg Nelson

4 January, 1995

This note describes a mistake found in the published version of SRC Research Report 131a [1]. If any other mistakes are found in the report, we will update this note with the corrections. To maintain identity with the printed version, the on-line version of the report available for anonymous FTP has *not* been changed to include these corrections.

If you wish to contact the authors with comments or questions about the report, please send e-mail to Allan Heydon (heydon@pa.dec.com).

4 January, 1995 — Pg 13, Figure 18

The assignment for the variable `c` should read `c := (131.6, 333.8)`, the same as the hint given for `c` in Figure 17. This mistake was brought to our attention by Arne Frick.
